Differentiator

Project2Pixel combines administrative expertise, technical development and AI/automation support. This hybrid approach allows organisations to implement systems that are not only built, but actually used effectively.

Founder Profile

Project2Pixel is founded by Natasha Fredericks, who brings over 10 years of experience in executive administration, project coordination and operational support across corporate and production environments. Her transition into digital systems and web development enables Project2Pixel to offer solutions that are both technically sound and operationally practical.

Partnership Approach

Project2Pixel is open to government partnerships, NGO collaborations, pilot programmes and digital enablement initiatives focused on digital inclusion, operational efficiency and community impact.
